KELSEY'S Rhododendrons, Azaleas and Other Hardy Native American Plants

Grown in the Carolina Mountains, at 3,800 feet elevation
HIGHLANDS NURSERY, Saginaw, N. C.

Abies fraseri, specimen on grounds of Highlands Nursery. Greatly superior to *Abies balsamea*, which is of little permanence or value.

To Landscape Architects, Parks, Cemeteries, Botanical Gardens and other Public Institutions a special discount of 10% will be allowed on prices in this catalog.

CLAIMS must be made immediately. If there is any mistake or fault on our part, it will be gladly rectified. All shipments travel at consignee's risk, and transportation companies must be held liable for damage in transit.

Always Address **HARLAN P. KELSEY**

KELSEY'S Hardy American Plants Rhododendrons and Azaleas

CATALOG OF HIGHLANDS NURSERY

Information

HIGHLANDS NURSERY SHIPMENTS are made from Pincola, N. C., freight station, and **prices in this list are made on this basis.** Freight and express rates gladly quoted. Via Norfolk Steamship Lines, deliveries to northern and eastern points are quick and rates low.

SALEM AND BOXFORD NURSERIES SHIPMENTS are made from Salem or Boxford direct, and Salem and Boxford **price-lists must be used in ordering.** Prices are about 25 per cent higher than for similar stock at our main **Highlands Nursery.** A fine stock of specimen Rhododendrons, Azaleas, Conifers, etc., may be seen at Salem and Boxford Nurseries, and deliveries to eastern points rarely take more than a day or two.

SHIPMENTS OF "COLLECTED" RHODODENDRON MAXIMUM AND KALMIAS are from our special fields in Pennsylvania and the South, depending on destination and quality of stock desired. The best clumps come from the South from high altitudes.

"COLLECTED" RHODODENDRON CATAWBIENSE AND RHODODENDRON CAROLINIANUM (PUNCTATUM) come only from the South.

OUR NURSERIES ARE UNIQUE, being the first and only to grow Native American Ornamentals, and we now have the only large and complete stock of Hardy American Plants in existence.

THE LOCATION OF HIGHLANDS NURSERY also is **unique, an elevation of 3,800 feet insuring unquestioned hardness.**

SHIPPING BEGINS IN SEPTEMBER, when we send out large Rhododendrons, Kalmias, and other evergreens, and bulbs and herbaceous plants, general stock going out in October and November, and in spring from about March 1 to May 15. Give shipping instructions, unless you wish to leave it to us. **We use our best judgment but assume no risk.**

OUR EXPORT SHIPMENTS reach the most remote countries in perfect condition; we have exported for over 25 years, and know how to pack.

A DESCRIPTIVE CATALOG, beautifully illustrated, is gladly mailed on request, and advice on the right way to grow Rhododendrons, Azaleas and other native plants gladly given.

HARLAN P. KELSEY, Owner

Cable Address
KELMONT-SALEM

SALEM, MASS.

Where Kelsey's Hardy American Plants Are Grown

HIGHLANDS NURSERY, under ideal natural conditions at 3,800 feet elevation in the Southern Alleghenies, produces absolutely hardy stock for latitudes as far north as Ottawa, Canada.

SALEM AND BOXFORD NURSERIES carry specimen plants, and are distributing points for New England. Send for Catalogs.

SPECIALTIES: Rhododendrons, Azaleas, Kalmias, Leucothoës, Galax, Rare Ericacææ, Lilies, Trilliums, and the largest general collection of Hardy Native American Plants in existence. Carload shipments for mass-planting.

LANDSCAPE DEPARTMENT. Planting plans made and executed. Wild gardens, woodland "under-planting," bog- and water-gardens, rockeries. Broad-leaved Evergreen effects. Formal gardens.

September and October is the time to successfully ship and plant Lilies, Trilliums, Cypripediums, Erythroniums and other Bulbs, and many Herbaceous Plants.

HARDY AMERICAN AZALEAS

American Azaleas are among the choicest ornamentals, whether exotic or native, and were but rarely seen in cultivation before being disseminated by Highlands Nursery.

They are seen at their best when planted in large masses and in properly prepared beds, and they richly repay any unusual care given them. Like most ericaceous plants they love deep, moist, well-drained soil, and these showy native species are particularly adapted to planting in shrub borders and with rhododendrons, their brilliant blossoms being set off by a background of dark foliage. The complete hardiness of all the species we offer is unquestioned. No American shrubs equal the native Azaleas, particularly *A. lutea*, for woodland and hillsides.

Our Carolina mountains have added no more beautiful plant to gardens than these American Azaleas, not even excepting the magnificent rhododendrons. Our stock of Azaleas, especially *A. arborescens* and *A. lutea* is unequalled. Usually all sizes over 1½ ft. are budded, and special attention is called to the larger-sized clumps. These are very desirable for immediate and permanent

Azalea vaseyi

effects. Such specimen stock has never been offered before.

Aznien arborescens. Fragrant White Azalea. In June the delightfully spicy, fragrant white flowers, with pink stamens, appear in profusion, lasting for weeks. Becomes a spreading clump 3 to 6 feet broad in cultivation; easy culture. The foliage often colors striking shades of red in late summer.

<p><i>latifolia</i>. Mountain Laurel. One of the grandest of our native, broad-leaved evergreen shrubs, attaining tree-like proportions in our southern mountains. In cultivation it is a broad, thick shrub, and when in full bloom, of surpassing beauty. The wheel-shaped flowers in close terminal corymbs, pure white to pink, appear in May or June in such profusion as almost to smother the foliage. Its thick, shining leaves, conspicuous the year round, make it a shrub of greatest value for massing. The hardiness of <i>Kalmia latifolia</i> is beyond doubt, it being found sparingly in Nova Scotia and increasingly in abundance through New England and the Middle Atlantic States (particularly in the higher altitudes), till the crest of the Southern Alleghenies is reached. Here, the true American home of the broad-leaved ericaceae, perfect conditions of soil and climate are found, producing such a luxuriance of growth as to form veritable jungles of gorgeous beauty, miles in extent. It is found throughout South Carolina, Georgia and Northern Florida, along the banks of streams and cypress swamps. This proves it to be a plant that will stand almost semi-tropical conditions as well as extreme cold. It is therefore extremely valuable for the Southern States, taking its place with the magnificent Indian Azaleas, which are not bardy in the North.</p>

RHODODENDRONS

**Rhododendron catawbiense*, of the Carolina Mountains

It is this magnificent *Rhododendron* that over a hundred years ago was introduced into Europe, supplying, together with *Rhododendron maximum* and *R. punctatum*, color and hardy blood to the cultivated "hybrids," but with a consequent loss of hardiness; and so today, for American gardeners where ironclad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the Southern Alleghenies, where it attains a height of 20 to 30 feet.

Considering the extreme hardiness, color of flower, compact growth and remarkable texture of foliage, which is a deep, shining green, and far superior to the better-known *Rhododendron maximum*, we can recommend the true native *catawbiense* as the finest for general use, withstanding exposure and extremes of temperature where other *Rhododendrons* fail.

Rhododendron catawbiense

EVERGREENS ARE MARKED WITH A STAR (*)

KELSEY'S Hardy American Plants

Rhododendrons and Azaleas

CATALOG OF HIGHLANDS NURSERY

RHODODENDRON CATAWBIENSE, continued

Do not confuse this true species, which is absolutely hardy, with the common so-called catawbiense hybrid seedling so freely imported from Europe, which is at best half-hardy, and even when branched above is a single stem, showing bareness underneath for years.

Unlike *Rhododendron maximum*, it is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy half-breed imported variety noted above), and, as sent out by Highlands Nursery are always on their own roots.

For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the Northern United States and Canada, where strictly hardy plants must be employed. As a rich, finished border to plantations of the commoner *Rhododendron maximum* and *Kalmia latifolia*, the value of *Rhododendron catawbiense* cannot be overestimated.

Do not compare our many-stemmed clumps with the single-stemmed, "bushy" half-hardy *Rhododendrons* offered by importers. There is no comparison.

**Rhododendron maximum*

THE GREAT AMERICAN ROSEBAY

Perfectly Hardy in the Latitude of Quebec

Rhododendron maximum is, without doubt, the noblest of American broad-leaved shrubs. It is found growing sparingly in New England and New York, more abundantly in the Pennsylvania mountains, but reaching perfection only in the Southern Alleghany mountains where it grows in such luxuriance as to form a striking feature in the mountain landscape. Its large, waxy white or delicately pink flowers appear in large trusses in July, the latest of all the *Rhododendrons*, greatly enhancing its ornamental value as a broad-leaved evergreen for finished landscape effect.

Not even in Asia do *Rhododendrons* grow more luxuriantly than in our Southern Alleghany Mountains, where they attain a height of 30 feet or more. They must be seen in their native lavishness of growth and bloom, on the mountain-sides or hanging over the dashing ice-cold streams and water-falls, to be properly appreciated, and a trip to the high Carolina mountains in spring and early summer is a never-to-be-forgotten series of joys to the lover of nature.

In our northern gardens *Rhododendron maximum* (and other species to a small extent) is subject to damaging attacks from the lace-wing fly, particularly in sunny locations. We recommend an emulsion of five to ten pounds of whale-oil soap and one to two quarts of kerosene to 100 gallons of water, used with a spray pump having a fine nozzle.

**Rhododendron carolinianum* (punctatum)

The smallest Alleghanian species, though it often attains a height of 15 feet and is wide-spreading. A very graceful shrub, with totally different aspect from the two species preceding. Leaves dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either *maximum* or *catawbiense*. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species.

Until this year we have been sending this beautiful and rare species out under the name of *punctatum*. Prof. Sargent has recently called attention to the fact that it is a distinct species from the *punctatum*, differing in time of bloom, with more showy and profuse flowers, and making a much larger and finer plant than the *punctatum*.

Rhododendrons and Kalmias Delivered at Your Station by the Carload

"Collected" and Nursery-grown

For the area covered and effect produced, a "carload" of Rhododendrons, or Kalmias are the cheapest landscape propositions offered. I am offering an unusual grade of splendid clumps, each plant a specimen and burlaped separately. Don't accept "cheap" stock, thrown into cars without hurlaping and with the fine, hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end.

Rhododendron maximum and *R. catawbiense*

In mixed car, delivered free at any station east of Mississippi River.

Car containing 150 maximum and 150 *catawbiense*, "collected" as above.

1½- to 4-ft. clumps—a total of 300—for \$400.

Car containing 250 maximum and 250 *catawbiense*, 1½- to 4-ft. clumps—a total of 500—for \$600.

Twenty-five years' experience growing "American Plants" is at the service of our customers.

Rhododendron *catawbiense*, "collected"

Each plant from the open and burlaped. Prices f. o. b. your station, if east of the Mississippi River.

Car containing 200 clumps, 1½ to 3½ ft., for.....\$280

Car containing 300 clumps, 1½ to 3½ ft., for..... 390

Car containing 400 clumps, 1½ to 3½ ft., for..... 480

Car containing 600 clumps, 1½ to 3½ ft., for..... 050

Other combinations and sizes gladly quoted.

It is the dream of every plant-lover to have, some day, a "Rhododendron Bed" and all that this implies. By following instructions given in our Descriptive Catalogs, you are assured success.

EVERGREENS ARE MARKED WITH A STAR (*)

KELSEY'S Hardy American Plants

Rhododendrons and Azaleas

CATALOG OF HIGHLANDS NURSERY

Rhododendron maximum

Prices in carload lots, delivered f. o. b. your station, if east of the Mississippi River, "collected" from open ground, and each specimen burlaped separately.

Car containing 300 clumps, 1½ to 4 ft., for.....	\$300
Car containing 400 clumps, 1½ to 4 ft., for.....	375
Car containing 600 clumps, 1½ to 4 ft., for.....	500

Other sizes or combinations will be made up to suit customers.

R. maximum is pure white, or often with pink or blush tinge.

It is far cheaper to buy our kind at slightly increased price and have plants that will GROW.

Rhododendron maximum, Extra Specimens

For those wishing perfect specimens I can supply a few ears of "collected," extremely heavy plants. Price on request.

Highlands Nursery grows and ships hundreds of thousands and is American headquarters for native plants.

Kalmia latifolia by carload

Each specimen burlaped, and highest-class clumps "collected" from open, delivered free at your station, if east of Mississippi River.

Car, containing 400 clumps, 1 to 3½ ft., for \$375. *Kalmia* may be added to help fill any *Rhododendron* car at \$1 per clump.

25,000 nursery-grown plants in all sizes. See free catalog.

At the same cost, nothing approaches our magnificent hardy American *Rhododendrons* and other native broad-leaved evergreens for splendid foliage and flower effects.

Best Plants for the Rhododendron Beds and for Ground-Cover

Some of the most successful are *Andromeda polifolia*, *Chamaedaphne calyculata*, *Dendrium buxifolium*, *D. prostratum*, *Ilex glabra*, *Leucothoe catesbaei*, *Pieris floribunda*, *Taxus minor*, *Galax aphylla*, *Gaultheria procumbens*, *Houstonia serpyllifolia*, *Mitchella repens*, *Shortia galacifolia*, *Vinca minor*, *V. minor alba*, *Xanthorrhiza apifolia*, Lilies, Trilliums, Erythroniums, Ferns, *Dicentra eximia*, Iris, etc.

KELSEY'S Hardy American Plants Rhododendrons and Azaleas

CATALOG OF HIGHLANDS NURSERY

TREES, SHRUBS AND VINES, continued

Xanthorrhiza apifolia. Yellow-root. 1 to 4 ft. Undoubtedly the finest American undershrub for planting under trees, along roadways, walks and borders, or where conditions of extreme moisture prevail. Finely cut foliage remains a good green till autumn; when it turns shades of orange and yellow. Now used by thousands in parks and private grounds. Peculiar brown-purple flowers in pendulous racemes, appear early.

reginæ (spectabile). Showy Lady's Slipper. 1 to 2 ft. The largest and one of the rarest of hardy orchids. The broadly ovate sepals and petals are pure white, while the large, inflated pouch is a beautiful soft red-rose. A strong grower, preferring peat soils. Succeeds well in the rhododendron bed or in the bog. June and early July.

Lilies

Should always be ordered in spring or summer for fall shipment where possible. Many species are exhausted early and some do not ship or transplant well in the spring. *L. superbum*, *L. canadense* and *L. carolinianum* thrive planted in March, April or May, though September and October planting is preferable.

Salem and Boxford Nurseries

Kelsey's Hardy American Plants

Successful Rhododendron oval at State Normal School, Salem.
"Fillers" used are Lilies, Azaleas, Xanthorrhiza,
Ferns, Violets, etc.

Salem Nurseries Shipments are made from Salem, Mass.

Boxford Nurseries Shipments are made from East Boxford, Mass., freight station.

From both Nurseries deliveries may be arranged for by truck to points along the North Shore and the vicinity of Boston.

Prices at our Salem and Boxford Nurseries are about 25 per cent higher than at our Highlands Nursery, the difference representing freight and other costs.

Specimen Stock. There is a demand for fine specimen stock in Conifers, Rhododendrons, Kalnias, Andromedas and other evergreens, and our local Nurseries are established to supply just this need which has been so long felt.

Prices are made to fit the quality of stock sent out. Few realize that the real value of nursery stock is largely underground. Frequent transplanting and handling specimens, with adequate burlaped balls, means success and quick results. It costs more, but it is the fixed policy of our Salem and Boxford Nurseries; and "cheap" stock will not be handled or sent out. **The best is always the cheapest.**

Visitors are always welcome, and arrangements may be made by telephone (Salem 820) to meet Mr. Kelsey personally at either Nursery.

Always address:
